One or two wifi routers - [Solved]

2019/11/03

I recently got an CBN CH6541E cable modem/router from my internet provider which has both 2.4 and 5 GHz capabilities but I also have a Netis WF2411D 2.4GHz wifi router. My question is can I use both the CBN router in 5GHz or dual band 2.4/5 GHz mods and at the same time the Netis router because it has better signal range(8 dB external antenna)? They will be about 1.5-2m apart from each other and be connected with LAN cable. Will the signals interfere with one each other?
