Wifi not showing up on network connections - [Solved]

2019/10/31

My computer is starting to act strange. Its a HP laptop. I bought it new about a year or so ago. When I go to network connections the normal part that says WIFI next to the Ethernet isn't showing up. Also when I move the mouse, not a connected one just the one on the actual laptop. It moved slow and isn't performing as usual. I already performed a restore and a reset on the computer. Problem still not solved. I though I had just fixed it for a moment when I clicked on the network connections, it appeared again and connected, the mouse problem went away as well and then after a minute it wasn't back and disappeared and the mouse started moving slow again! I just can't figure it out.

how to locate a gps tracker on your vehicle

Some law enforcements may wiretap your cell phone for eavesdropping of all your conversations.
