Powerline only connects to one of the options of the modem - [Solved]

2019/11/03

I'm not very knowledgeable about networking, but I'd imagine this is pretty basic. The router connected to the pc in my house has two ports. We'll just call it "USER1" and "USER2" when you want to connect to wi-fi you can see both. I have a powerline for my desktop downstairs because my wifi was SO unstable. When I'm connecting to wifi I can chose either user1 or user2 connections that the router provides. I REALLY want to use user1 because it's faster and has quicker mb/s download speed....saw this while using wifi. When I disable wifi and utilize the powerline (recognized as ethernet via windows network control center) it only allows me to connect to user2...it does this automatically and doesn't give me an options to switch nor disconnect from user2.....i've tried forgetting this network via wifi before i transfer to powerline. Simply put, I can't connect to user1 only user2 when i go to my powerline....why or how do I switch to the other section?

## **how to spot a tracker on your car**

Portable cell phone jammers alligator powerful 10 bands jammer (10w) alligator is an extremely powerful all frequencies jammer that is capable to disable 10 frequencies at the same time.
