IP cam and cascaded routers - [Solved]

2019/11/05

I am cascading a xfinity wifi router XB3(main) and a netgear r7000(cascaded lan to lan).Using the same SSID on both routers. Netgear in same subnet. No issues with internet access. On either. I have port forwarding setup on the main to be cameras. Using foscam FI8910 cameras. I use the OWLR Foscam app. I have no issues viewing cameras externally outside of the WiFi zones. If I add the camera while on the netgear WiFi then I can view the cameras internally only while connected to netgear WiFi. If I move over to the xfinity WiFi I lose the internal access to the cameras. And vice versa if I add cams from xfinity WiFi they are viewable internally until I move onto the netgear WiFi. I want to be able to view the cameras seamlessly between the two WiFi zones. Anybody help me out here. Thanks. Was going to setup the cascaded router as a different SSID in the same subnet and see if that's the issue.

Thanks
